

Quality That Connects

Melni LLC – 265 Ash St. N. – Twin Falls, ID 83301
Phone (208) 736-8266 – www.melniconnectors.com

COMMONLY ASKED QUESTIONS

- **Will all the connectors work with copper and aluminum wire?**
Currently Melni Connectors are rated for use with aluminum wire rated up to 90°C
- **Can these connectors be reused?**
All Melni Connectors are meant for permanent, one-time use. However, the wire crimped inside the device can be salvaged if a Melni connector needs to be replaced.
- **Will the currently available connectors work with metric sizes?**
Yes. The 1/0-2/0 will work with 35-50mm metric wire. The #2-#4 AWG will work with 16-25mm metric wire.
- **How long have these connectors been available and in the field?**
Beta testing began two years ago on the 1/0-2/0. Those units are still running power to a home and workshops. They have been on the market since March 2015.
- **What is the product warranty?**
All Melni Connectors have a two year warranty from time of installation. For further info please see <http://www.melniconnectors.com/about-us/>
- **Can the connector be used to splice wire on a spool?**
Yes. The connector can withstand a linear pull of up to 1000lbs and bending up to 90° without damaging the connector or water sealing ability.
- **Can this connector be used in applications other than agricultural?**
Yes. These connectors can be used in any application that requires connection of secondary cables rated for 600V or less.
- **Are these connectors listed with a Nationally Recognized Testing Lab (i.e. UL approved)?**
Both devices have passed preliminary and beta testing and are currently in testing for certification. For specific test results and criteria please visit www.melniconnectors.com.
